

Helper EMR

An easy- to-use Electronic Medical Records (EMR) system that is just right for your practice!

Do you think Electronic Medical Records (EMR) are only used by large practices? Not anymore! Helper EMR is an easy-to-use, Web-based EMR that is integrated with Helper Practice Management software to automate the clinical aspects of your practice and help you provide quality care.

Helper EMR enables you to create and manage patient documentation effectively and efficiently. With Helper EMR's notes functionality and templates, you can create assessments, develop treatment plans and write progress notes. And, Helper EMR becomes your central repository for patient documentation, giving you easy, secure access to accurate and complete medical records at any time. In addition, you can track the medications your client is taking, rounding out a complete medical record.

medications, check for drug interactions, track allergies, send prescriptions to pharmacies electronically, receive electronic refill requests from pharmacies, and print medication-specific educational information for clients.

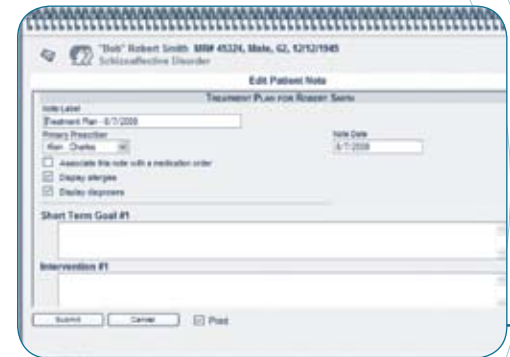

A WHOLE NEW WORLD

The days of hand writing notes and searching for paper charts are over. How many times have you tried to piece together your notes to make sure you are generating a bill that provides the maximum reimbursement? How often have you tried to find a chart, and then when you find the chart, it's not complete?

You're busy -- and your main goal is to maximize time spent helping your clients and minimize time spent doing paperwork. With Helper EMR, you can focus on your clients while the system keeps track of client records, improves your efficiency and enables you to provide a higher level of care.

BENEFITS TO PRACTICES

- Simplifies documentation
